

Lab Sheet 01

(01)
I.

No. One displayed on the terminal is my private ip address while the one shown in website is my public ip address.

II.

Only the last two numbers are different 10.23 are constant in both

III.

One with the numbers is called the ipv4 address and the one with mixed letters is called the ipv6 address

IV.

```
ChamalInduwara on ~
> ping -c 4 www.google.com
PING www.google.com (142.251.152.119): 56 data bytes
64 bytes from 142.251.152.119: icmp_seq=0 ttl=117 time=109.749 ms
64 bytes from 142.251.152.119: icmp_seq=1 ttl=117 time=46.829 ms
64 bytes from 142.251.152.119: icmp_seq=2 ttl=117 time=45.859 ms
64 bytes from 142.251.152.119: icmp_seq=3 ttl=117 time=82.642 ms

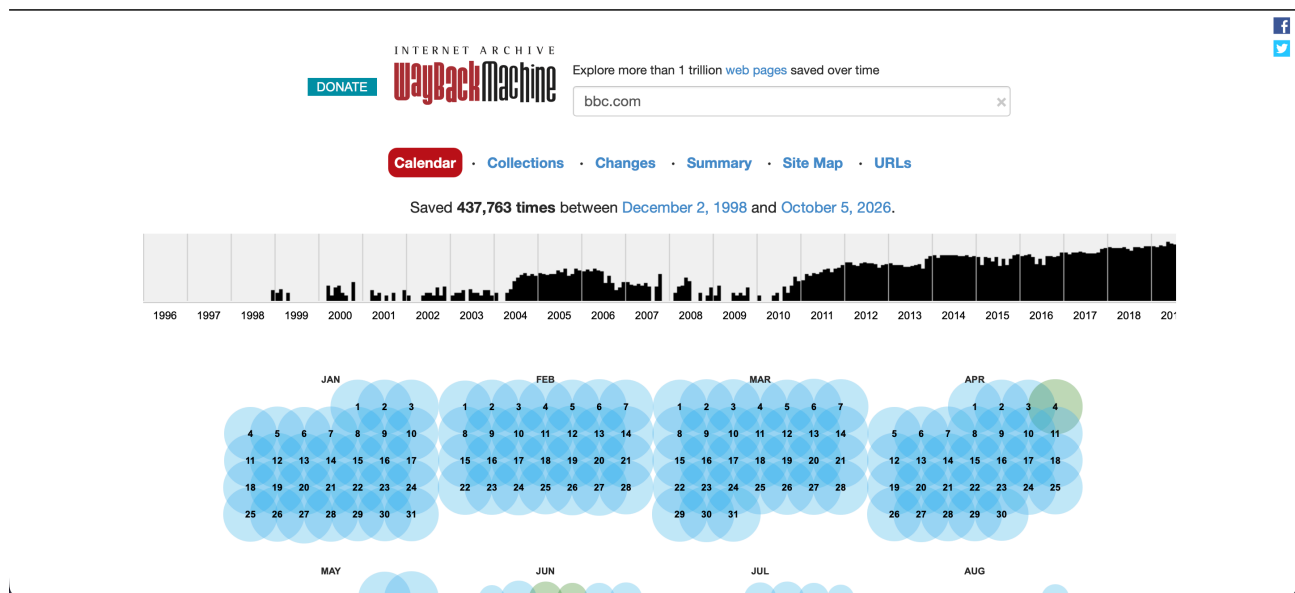

--- www.google.com ping statistics ---
4 packets transmitted, 4 packets received, 0.0% packet loss
round-trip min/avg/max/stddev = 45.859/71.270/109.749/26.707 ms

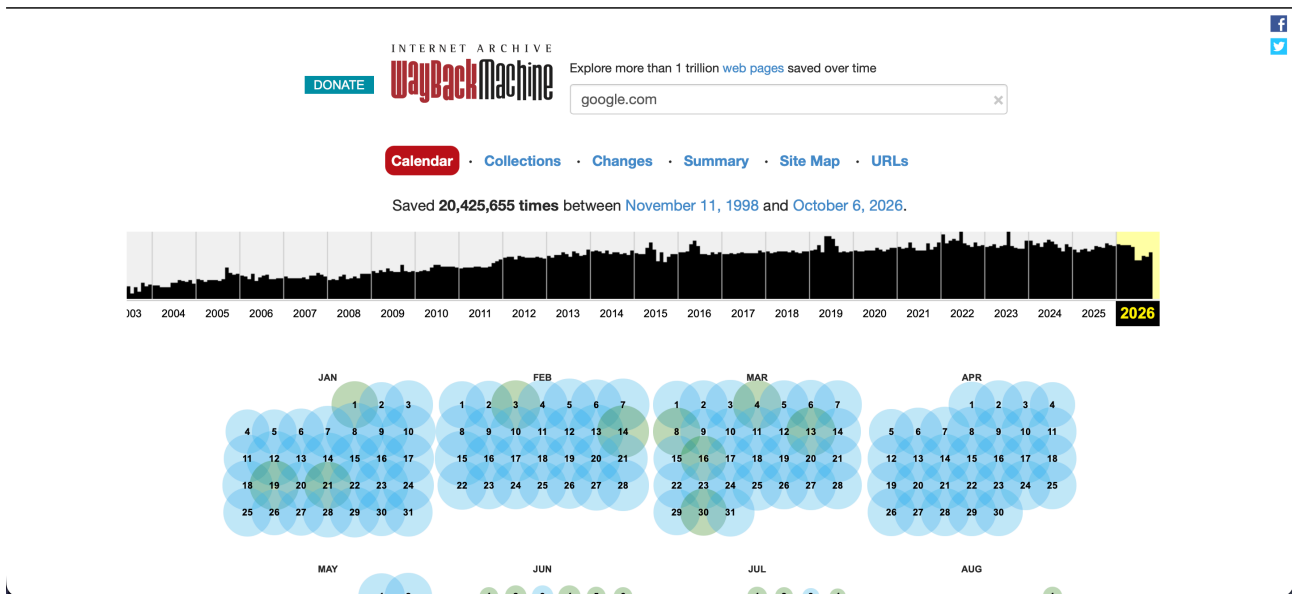

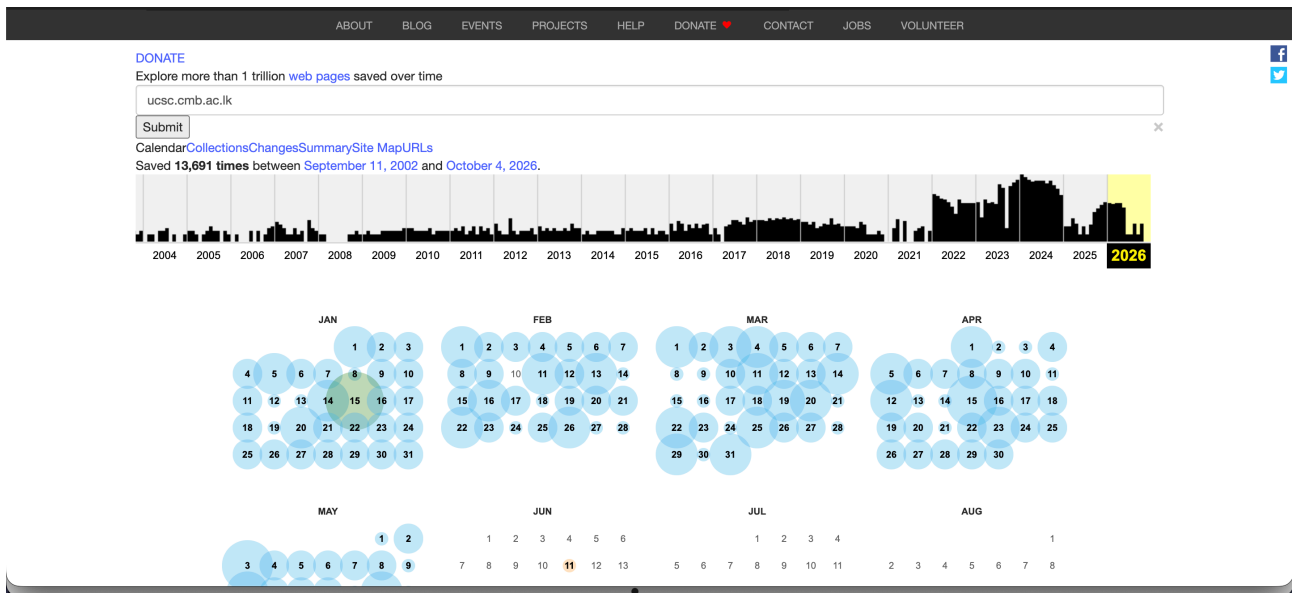

ChamalInduwara on ~
> nslookup ucsc.cmb.ac.lk
Server:      10.22.254.10
Address:     10.22.254.10#53

Name:   ucsc.cmb.ac.lk
Address: 192.248.22.125
```

They find out the ip addresses of the given websites.

(02)

I.
Old versions looks more static and heavily relied on many colours and dividing the webpage into smaller boxes to fit more content while latest ones looks more modern with polished UI.

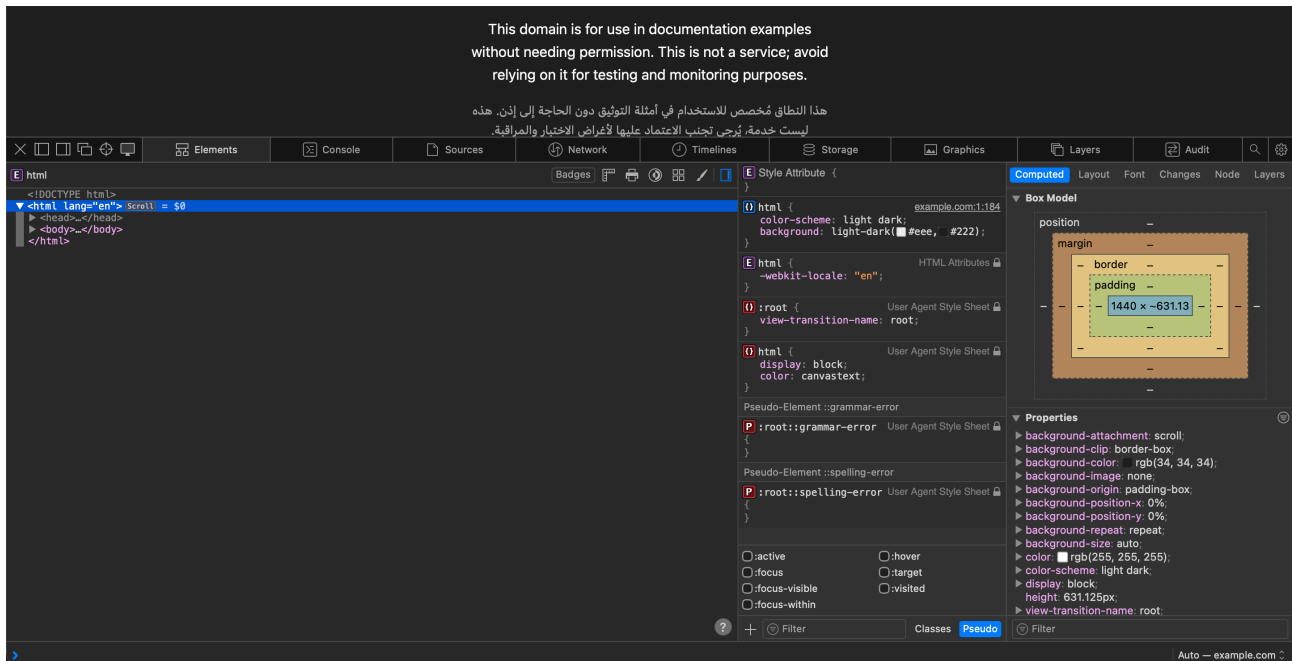

II.
No. Some images might have been removed from the servers so the urls aren't pointing to anything anymore.

III.
Sir Tim Berners-Lee
1989

IV.
bbc.com = 1998 Dec 02
google.com = 1998 Nov 11
ucsc.cmb.ac.lk = 2002 Sep 11

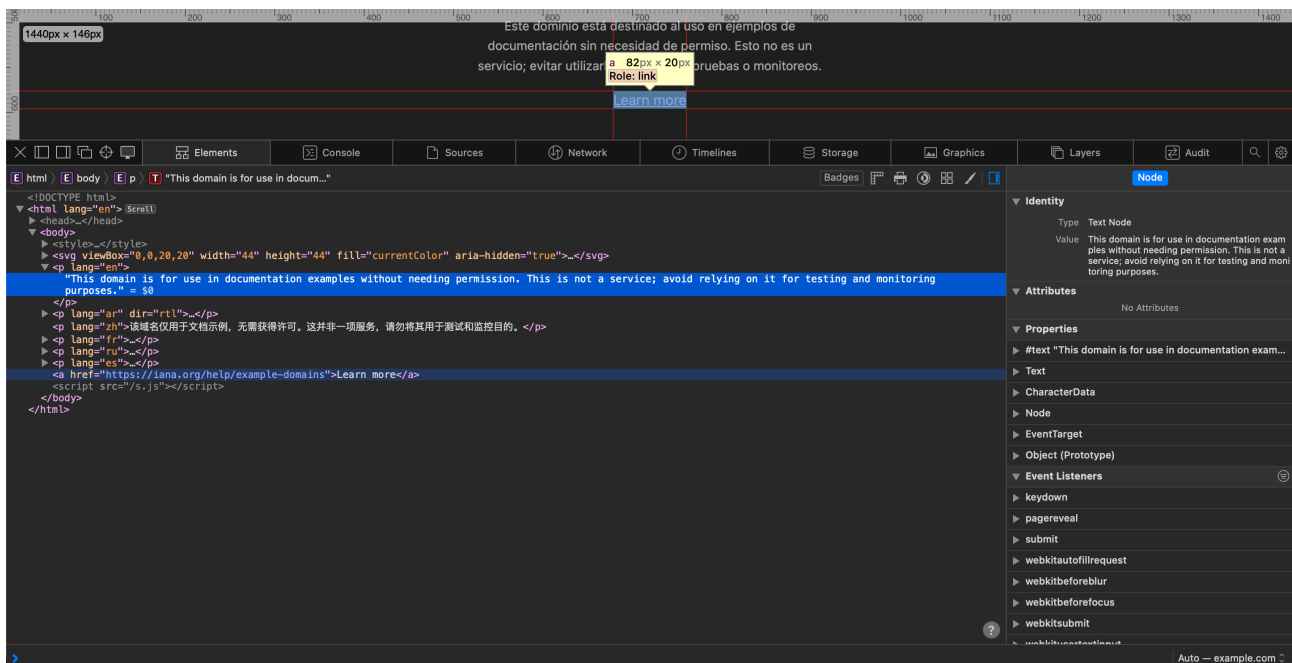

(03)

I.

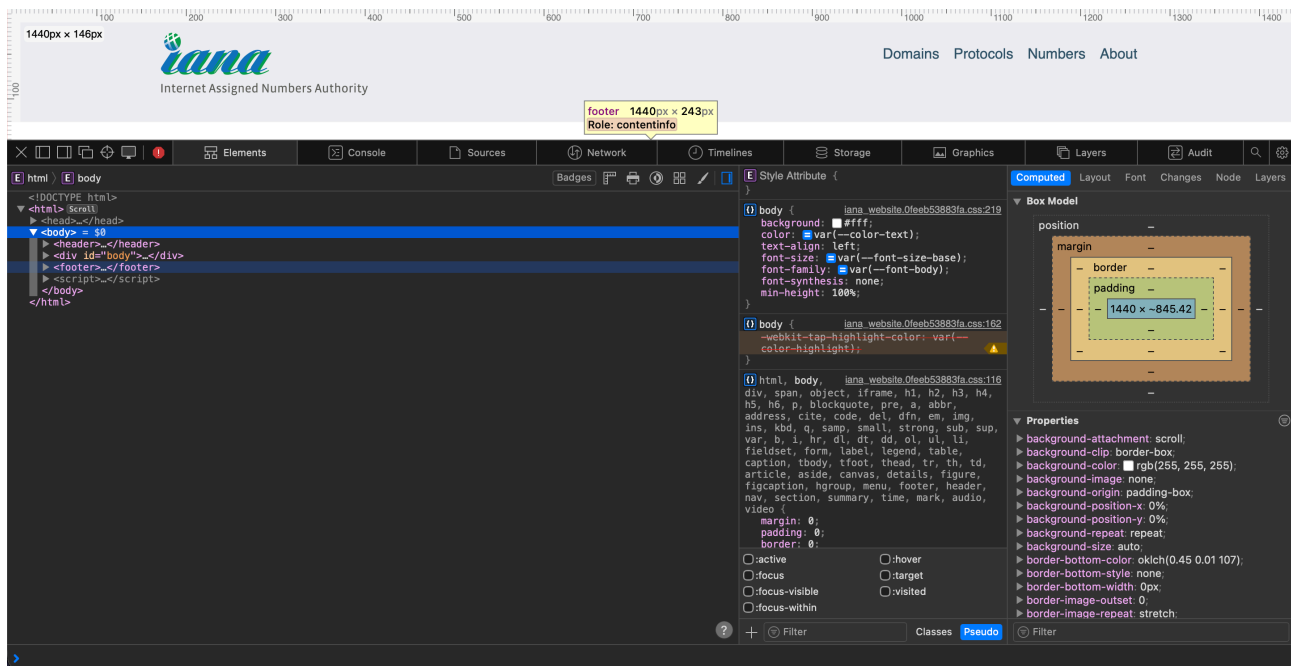

The content of the html page with layout indicator and all the styling used on different elements on the web page.

II.

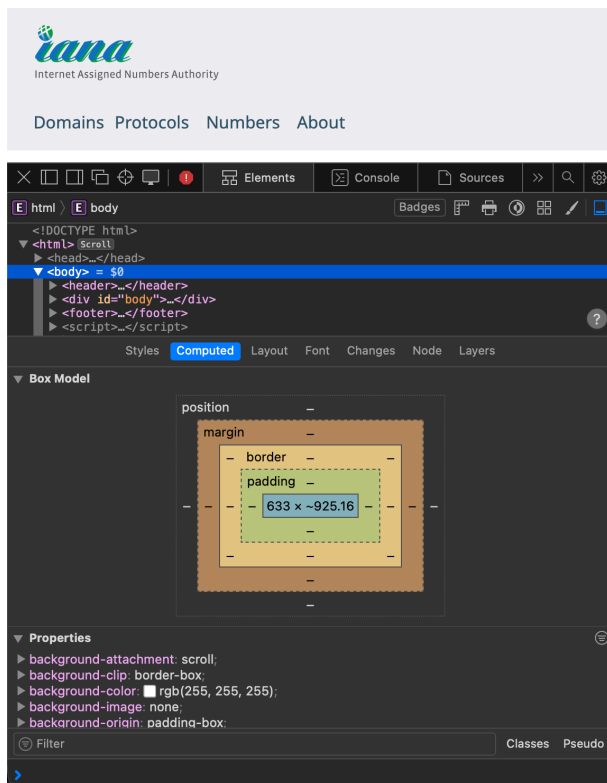

Yes. There are links and text

III.

I was taken into a different website directed by the link and the inspect elements automatically changed.

IV.

The content changed the positions so it would fit inside the browser.

V.

Audit - it may be an automatic inspection on network and other resources used in the website.
