University of Colombo School of Computing
SCS1311 Internet and Web Technologies
Practical 02

Task 1: Create a Simple HTML Page

1. Open a text editor of your choice (e.g., Notepad, Visual Studio Code).
2. Save a new file as `basic.html`.
3. Write the basic structure of an HTML document. Include the following:

   - Use the `<html>` tag to define the document.
   - Add a `<head>` section with a `<title>` of your choice.
   - Use the `<body>` section to display content on the webpage.

Your expected output will look like the image below.

Task 2: Add Paragraphs and Line Breaks

1. Extend your `basic.html` file.
2. Add two or more paragraphs using the `<p>` tag.
3. Use the `<br>` tag to insert a line break within a paragraph.
4. Write a short introduction about yourself using two paragraphs and at least one line break.

Expected output :

This is the first paragraph. HTML is fun!

This is the second paragraph.
It has a line break in the middle.

Task 3: Experiment with Nested Tags

1. Create a new `<p>` tag inside the `<body>`.
2. Add a combination of text and HTML elements like `<br>` within the paragraph.

Expected output:

My favorite movies include:
- Inception
- The Shawshank Redemption
- The Dark Knight
- Interstellar
- Forrest Gump

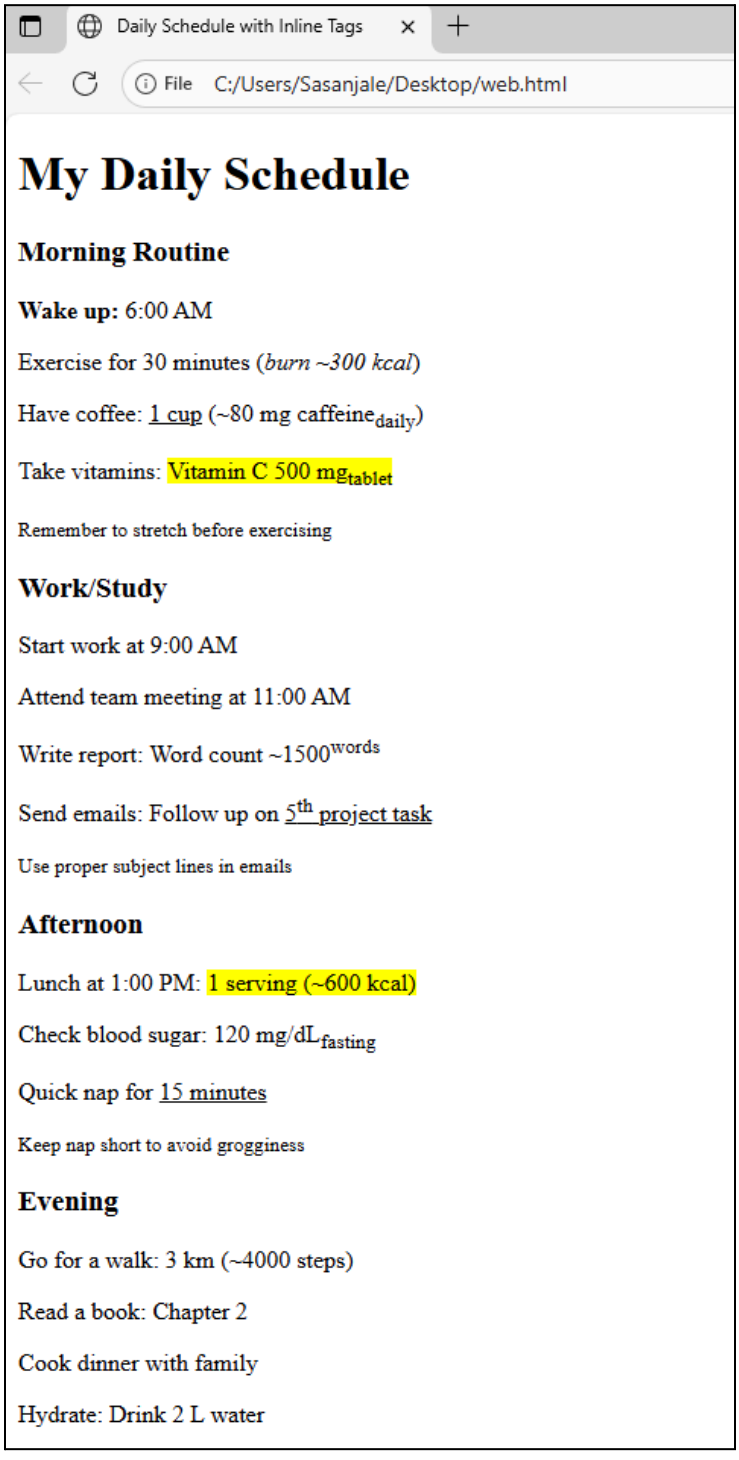

Task 4: Add Comments to Your Code

1. Learn to use comments in your HTML file. Comments do not appear on the webpage but help in understanding the code.
2. Add a comment before each section of your HTML file.

```
<!-- This is the heading section -->
<head>
    <title>My First HTML Page</title>
</head>
```

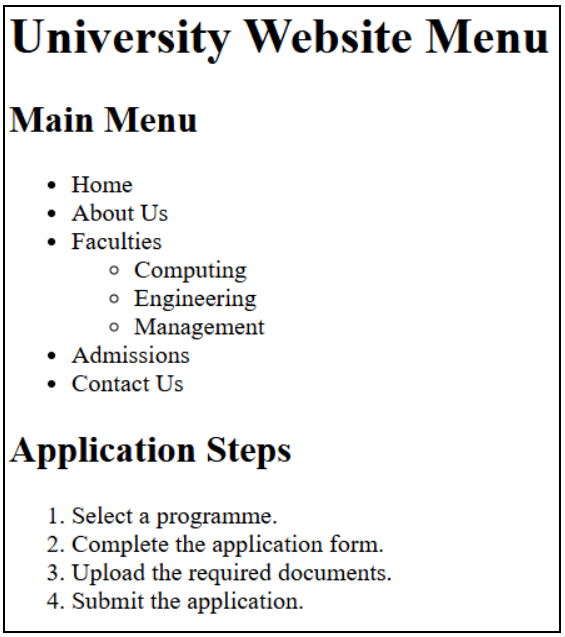

Add comments explaining each part of your HTML document created in task 3 with following syntax.

Task 5: Create the Following HTML Page

Task 6: Build a University Website Menu

1. Use an unordered list for the main navigation menu.
2. Use an ordered list to display the steps for applying to the university.
3. Create a nested list of programmes under the heading “Faculties”.
4. You may choose the list items according to your preference.

University Website Menu

Main Menu

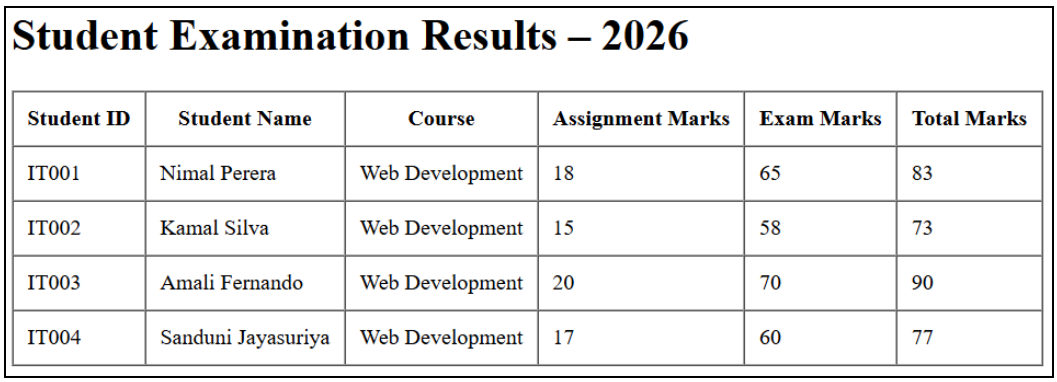

- Home
- About Us
- Faculties
  - Computing
  - Engineering
  - Management
- Admissions
- Contact Us

Application Steps

1. Select a programme.
2. Complete the application form.
3. Upload the required documents.
4. Submit the application.

Task 7: Develop a Webpage to Display Student Examination Results

1. Set the webpage title to **Student Examination Results**.
2. Add a table heading called **Student Examination Results – 2026**.
3. Create an HTML table with the following columns: **Student ID, Student Name, Course, Assignment Marks, Exam Marks, and Total Marks.**
4. Insert the student records provided in the following table.
5. Use the <table>, <tr>, <th>, and <td> HTML elements appropriately to structure the table.

Student Examination Results – 2026

Student ID	Student Name	Course	Assignment Marks	Exam Marks	Total Marks
IT001	Nimal Perera	Web Development	18	65	83
IT002	Kamal Silva	Web Development	15	58	73
IT003	Amali Fernando	Web Development	20	70	90
IT004	Sanduni Jayasuriya	Web Development	17	60	77
